Firm Dates for Drilling to Commence at Lyndon Gold Project, WA.

Integrated Resources Group Limited ("IRG") is pleased to advise that drilling of targets at the Company's Lyndon Gold Project will commence on 16th September 2010.

Final approval for our program of works from the Department of Mines and Petroleum has been received.

A contract has been signed with our contract driller to commence a drill program of up to 4,000 metres in over 50 holes on targets that have geochemical indications of gold plus, for most targets, copper and silver as outlined in the Company announcement of August 24th 2010.

Yours sincerely

Integrated Resources Group Limited

John Smith
Company Secretary

About Lyndon Station

The 100% owned Lyndon gold, silver and copper prospects are located in the Gascoyne Region of Western Australia approximately 300km northeast of Carnarvon. Four contiguous tenements (2 granted, 2 applications) of 652 square kilometres contain a cluster of high grade workings dating back to the 1950's that have never drilled at depth nor explored by modern techniques. Previously announced sampling confirmed the prospectivity of the tenements for open pitable high grade gold and also gold, silver and base metal targets.

Technical information in this report is compiled by a Competent Person as defined in the JORC Code being Dr Angus Collins (BSc (Hons) PhD FAusIMM) who acts as a Consulting Geologist to Integrated Resources Group Limited. Dr Collins has sufficient experience in mineral resource exploration relevant to the style of mineralisation and type of deposit under consideration and consents to the inclusion in the public release of the matters based on their information in the form and context in which it appears.
